Telecom Vanuatu Ltd

## Fiber Internet

Enterprises worldwide are leveraging upon the borderless power of the Internet to develop and expand their activities. In order to allow local enterprises and multinationals to be part of the Global Business arena, Telecom Vanuatu Limited is connected to a highly resilient submarine cable infrastructure to provide global connectivity solutions.

Our fiber access network is based on both point-to-point technology and a state-of-the-art Gigabit passive Optical Network (GPON) which is a point-to-multipoint technology.

TVL's Fiber Internet service includes Service Level Agreements (SLA) ensuring your businesses operate with optimum uptime.

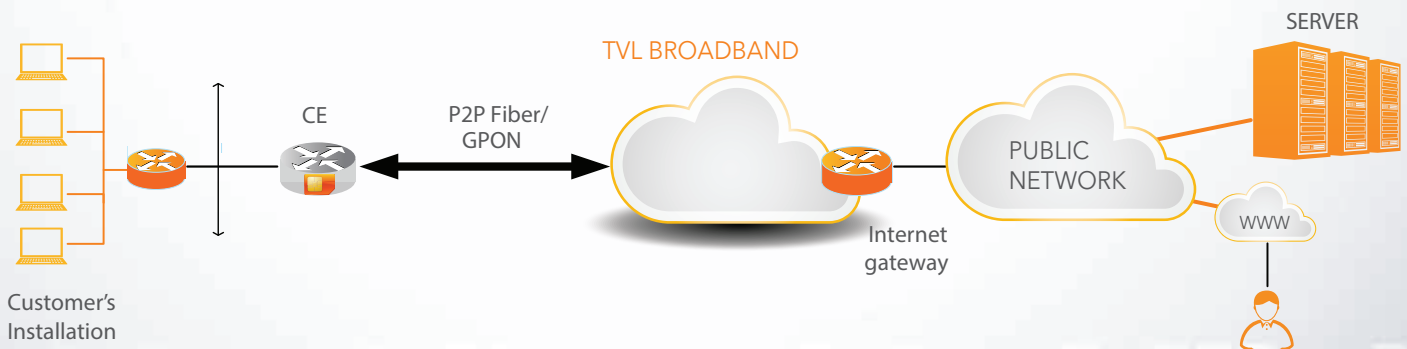

Our Fiber Internet portfolio comprises of the following:

Offers	Fiber Premium	Fiber Biz
Bandwidth	Symmetrical	Symmetrical
Target contention ratio	1:5	1:10
IP Address	Static	Dynamic
SLA	Gold	Standard
Min. contractual period	24 months	24 months

### Key features and benefits:

- High Service Availability: Enhanced resiliency on submarine optical fiber network
- Ease of implementation: Delivery on Ethernet Interface using P2P links or GPON access
- Scalability and flexibility: Wide range of bandwidth available to suit all businesses needs with ease of upgrade and downgrade
- Security and Reliability: A secured VPN tunnel can be built via the Global Internet
